NSW Standard plan electricity prices

Schedule of charges from 1 July 2025.

Prices explained

Depending on the electricity plan you choose, you will see a combination of the following charges as applicable.

| | |
|----------------------|--|
| Supply charge | A fixed price per day. |
| Usage charge | A price per unit of usage (measured in kilowatt hours (kWh)) for the amount of electricity you use at your premises. |
| Demand charge | A charge for the maximum demand placed on the electricity network at your premises during the defined time period and measured in kW or kVA depending on the plan. |

OTHER INFORMATION AND FEES

The following section applies to customers on either Residential or Business plans.

From time-to-time, you might be charged extra fees and charges. These vary depending on your contract type. If a government, regulator, network distributor or a metering provider applies, varies or introduces a fee, charge or tax, we may pass through all or part of this varied or new fee, charge or tax to you.

Distributor service charges

The following services will be charged as a pass through from the relevant electricity distributor (Essential Energy or Endeavour Energy). The charges listed below are the most common services requested by ActewAGL customers in NSW. Charges for services provided by the electricity distributor (in addition to the ones listed below) will also be passed through to you. For more information on distributor service charges please visit your distributor's website.

- Special meter read
- Meter test – business hours
- Supply of conveyancing information
- Controlled load conversions
- Disconnections site visit (only) business hours payment received
- Disconnection/de-energisation at meter box business hours
- Disconnection/de-energisation at pole top/pillar box business hours
- Rectification of illegal connection
- Reconnection outside business hours
- Site establishment per NMI.

Reference price comparison

What do these regulated prices for standard contracts mean for the average customer?

Since 1 July 2019 electricity retailers in NSW have been required to tell residential and some small business customers about how their electricity rates compare to the benchmark 'reference price' set by the Australian Energy Regulator (AER) for an average customer. An average residential or small business customer is someone in a particular distribution area who uses the average annual household/small business consumption determined by the AER. Where an energy plan includes different components (i.e. controlled load and time of use), the AER has also specified how the average annual usage should be split between these components. Keep in mind that the figures in this section are based on the usage patterns of an 'average customer'. Your electricity costs may be significantly different depending on your own actual usage.
