REFERENCE PRICE COMPARISON

Since 1 July 2019 electricity retailers in NSW have been required to tell residential and some small business customers about how their electricity rates compare to the benchmark 'reference price' set by the Australian Energy Regulator (AER) for an average customer. An average residential or small business customer is someone in a particular distribution area who uses the average annual household/small business consumption determined by the AER. Where an energy plan includes different components (i.e. controlled load and time of use), the AER has also specified how the average annual usage should be split between these components. Keep in mind that the figures in this section are based on the usage patterns of an 'average customer'. Your electricity costs may be significantly different depending on your own actual usage.

COMPARISON OF ACTEWAGL SIMPLE SAVER PLAN CONTRACT PRICES AND THE REFERENCE PRICE – ESSENTIAL ENERGY REGION

| Plan | Average annual usage (kWh) | Annual cost based on average usage (incl. GST) | Comparison to reference price |
